

Illumina Insight™ provides international situational awareness for critical operations and strategic decision-making. Our services help you protect and plan for your people, places, products, and customers, saving you time and money.

Our Advantage

Granularity Our combined expertise—scholars and expert analysts—permits real time understanding as well as a predictive analytic capability to spot important events, issues, and influential actors significantly in advance of other approaches.

Context and Perspective Our multinational team of experts produces tailored, actionable intelligence in the business, security, political, economic, energy, cyber, and legal disciplines.

Global Coverage With native languages and sociocultural savvy, we focus on Latin America, China, North Korea, Russia, Central Asia, India, Africa, Iran, and the Middle East.

Broad Digital Coverage Using our proprietary technology for speed, correlation, and follow-up validation, we assess and alert based on streaming data and native language sources, including social media (global/local social networking sites, blogs, mini blogs, YouTube), multimedia (Internet, press and publications, broadcast/video, geospatial, and imagery), official records, as well as academic and professional networks.

Responsiveness We emphasize customization, speed, and responsiveness. The client determines what is needed (concise analysis, in-depth research, ad hoc answers); how often it is needed (on demand, daily, weekly, monthly, quarterly); and how it is delivered (written product; phone).
